Summary

Detail-oriented Django Developer with hands-on experience in designing, developing, and deploying scalable web applications using Django and Django REST Framework. Proven ability to build blog platforms, e-commerce systems, real-time chat applications, and RESTful APIs, with a strong focus on clean code, performance, and security.

Experienced in full-stack development, database design, authentication systems, and API integration. Passionate about learning new technologies and delivering high-quality software solutions.

Skills

Backend: Python, Django, Django REST Framework (DRF), RESTful API Development, JWT Authentication

Frontend: HTML5, CSS3, Bootstrap, JavaScript, React.js

Databases: MySQL, PostgreSQL, SQLite

Tools and Technologies: Git, GitHub, Django ORM, Celery, Redis

Experience

Backend Developer Intern

August 2025 – November 2025

Backend API (Remote)

Tools Used: Django, DRF, MySQL

- **Built and maintained scalable RESTful API services for a food ordering platform** using Django and Django REST Framework.
- Designed and implemented backend features, including user authentication, order management, and menu handling.
- Integrated MySQL for efficient data storage and optimized database queries to improve performance.
- Ensured reliable API responses through testing and debugging.
- Collaborated with frontend developers to deliver seamless system integration and enhance overall functionality.

Projects

E-commerce Web Application | Python, Django

March 2025 – May 2025

- **Developed a complete e-commerce platform with** product listings, cart, and checkout functionality.
- Implemented order management, a simulated payment workflow, and inventory control.
- Designed a secure user authentication and authorization system.
- Built an admin dashboard for managing products, users, and orders.

REST API Project (DRF) | Django REST Framework, Python, JWT, MySQL

January 2025 – March 2025

- Designed and implemented RESTful APIs using Django REST Framework.
- Developed CRUD APIs for users, products, blogs, and orders.
- Implemented JWT authentication and permission controls.
- Utilized serializers, viewsets, and routers for a clean and maintainable API structure.
- Tested APIs using Postman and automated test cases.

Certifications

- **Python Django 101 – Simplilearn (2025):** Completed practical case studies involving SQLite, data retrieval, dashboards, and project development.
- **Linux Fundamentals – TryHackMe (2025):** Completed foundational Linux training from start to finish.

Education

Higher Secondary Certificate

Ranguniya College, Chittagong

Graduated: 2021

GPA: 3.50 / 05
