

Ashraful Islam

Khilgoan, Dhaka | [✉ ashraful52038@gmail.com](mailto:ashraful52038@gmail.com) | [☎ +880 01875-214934](tel:+8801875214934) | [🌐 LinkedIn](#) | [🐙 GitHub](#)

Education

Shahjalal University of Science and Technology, BSc in Software Engineering 2022 – Present
CGPA: 3.21 (out of 4.00)

Professional Experience

LogiQbits Limited – Software Engineer Intern Dec 2025 – Present

- Gaining practical experience in professional software development workflows and industry practices.

Technical Skills

Languages: Go, C++, JavaScript, Java, Python, SQL
Frameworks: Next.js, Node.js, Express, PyTorch, React
Tools: Git, Docker, RabbitMQ, Vercel, Figma, MySQL
Concepts: OOP, Machine Learning, Algorithms, Data Structures, Microservices

Publications

Dengue Detection Using CBC Dataset Utilizing Multiple ML Algorithms JUCS, 27(1), 2021

- Journal of Universal Computer Science*, vol. 27, no. 1, pp. 2987-2989 (2021)
- Developed ML models for early dengue detection using Complete Blood Count (CBC) data.
- Applied multiple algorithms to address critical health challenges in Bangladesh.

Projects

RabbitMQ Email Dispatcher – Go, RabbitMQ [🐙 GitHub](#)

- Async email dispatch using **Go** and **RabbitMQ** with producer-consumer pattern.

Go Backend API – REST API [🐙 GitHub](#)

- Scalable RESTful API with authentication and clean architecture.

GreenTop E-commerce – Next.js [🐙 GitHub](#)

- Full-stack platform with **Next.js**, **Sanity CMS**, **Clerk** auth, and **Stripe**.

RabbitMQ Examples – Message Queues [🐙 GitHub](#)

- Implemented work queues, pub/sub, routing, and topic exchange patterns.

Movie Rec. System – ML [🐙 GitHub](#)

- Content-based recommendation system using machine learning algorithms.

Research Experience

Stroke Prediction Using Hybrid ML Models 2025 – Present

- Investigating stroke risk using **Random Forest**, **Decision Tree**, and ensemble methods.

Achievements

- NASA Space Apps Challenge 2023:** Top 50 teams globally.
- Techfest IIT Bombay:** Mud Rover challenge finalist.
- Competitive Programming:** 500+ problems on Codeforces, 155-day streak.
